North American Development Bank
SUMMARY OF PROJECT IMPLEMENTATION ACTIVITIES
ACTIVE PROJECTS
March 31, 2021

The North American Development Bank (NADB) provides financing and other support for infrastructure projects that enhance the environmental condition of the U.S.-Mexico border region. NADB works closely with border communities, state agencies and other entities to develop and finance affordable, self-sustaining projects with broad community support. Each project must pass through a public participation and certification process to be eligible for financing from NADB.

During the first quarter of 2021, NADB had 45 active projects in various stages of project implementation.¹ A total of US$601.1 million in loans and grants has been contracted to help finance those projects, and approximately 75% of those funds have already been disbursed to project sponsors. Six projects completed construction and/or financing activity during the period, leaving 39 active projects at the end of the quarter. A breakdown of NADB financing by program for the active projects is shown in the table below.

NADB Funding by Program for Active Projects
(U.S. Dollars)

* Some projects have both a loan and a grant. Likewise, a loan or grant may cover more than one project.
** This program funded by NADB offers grant financing for the implementation of critical environmental infrastructure projects in low income-communities.
*** This program funded by EPA and administered by NADB offers grant financing for the implementation of municipal drinking water and wastewater infrastructure projects.

To date, NADB has contracted a cumulative total of more than US$3.4 billion in loans and grants to help finance 280 certified projects estimated to cost a total of US$10.5 billion to implement. Of the financing contracted, 95% has been disbursed to project sponsors for the implementation of 270 projects. Of the 280 projects financed by the Bank, 240 have completed construction and financing activity (except for the amortization of loans) and/or have otherwise been closed.

The implementation status of NADB-funded active projects is presented in the following pages.

¹ Active projects are defined as those projects with NADB funding contracted that are in the process of being implemented and/or for which NADB financing is pending disbursement.

<tbody>
<tr>
<td><strong>Agua Prieta, Sonora, Mexico</strong>&lt;br&gt;Replacement of the Main Outfall in the Wastewater Collection System</td>
<td>Rehabilitation of a section of the main outfall.</td>
<td>The Bank is a source of grant funds through the Community Assistance Program (CAP) to complement Mexican federal funding and capital investments from the local water utility (COMAPAS-Agua Prieta). On November 12, 2020, the Bank approved a CAP grant for up to US$500,000 for project implementation. The corresponding grant agreement was signed on February 23, 2021.</td>
<td><strong>Project construction activities have been divided into two sections. The North section (3,838 ft) was completed with Mexican funding in December 2020. Procurement for the construction of the South section (4,127 ft) to be funded by NADB is expected to begin in May 2021.</strong></td>
</tr>
<tr>
<td><strong>Ahumada, Chihuahua, Mexico</strong>&lt;br&gt;Equipment for Sanitary Landfill Operations</td>
<td>Acquisition of new equipment for landfill operations, including a mini-loader skid steer, water truck, 3.5 or 4-ton truck with hydraulic dump, vehicle scale, portable generator, portable welder and pressure washer.</td>
<td><strong>The Bank is a source of grant funds through CAP, which complements the landfill construction project funded jointly by the Municipality and the Mexican federal government. On June 16, 2016, the Bank approved a CAP grant for up to US$300,000 to cover the equipment costs, including possible fluctuations in the exchange rate. The corresponding grant agreement was signed on December 12, 2016. The first disbursement occurred in June 2018. The final disbursement occurred on October 10, 2019, leaving an unused balance of US$93,662. On March 31, 2021, the unused funds were deobligated, reducing the CAP grant for this project to US$206,338.</strong></td>
<td><strong>Bidding to procure the landfill equipment began in August 2017. Contracts for the purchase of a flatbed truck and water tank truck were awarded in October 2017, and the equipment was delivered in June 2018. A contract for the purchase of a skid steer was awarded in May 2018, and the equipment was delivered in October 2018. Training in the proper operation and maintenance of the equipment could not be completed because of the COVID-19 pandemic and related restrictions. The two-year maintenance service package included with the equipment purchase was completed in 2020.</strong></td>
</tr>
<tr>
<td><strong>Anthony, New Mexico, USA</strong>&lt;br&gt;Anthony Lift Station Replacement Project</td>
<td>Replacement of the Sonic Lift Station, including construction of a force main and gravity line, to convey wastewater to the Anthony Wastewater Treatment Plant.</td>
<td><strong>The Bank is a source of grant funds through the Border Environment Infrastructure Fund (BEIF). On February 29, 2016, EPA approved the Bank’s recommendation to provide US$2.81 million in BEIF construction assistance for this project. The corresponding grant agreement was signed on June 17, 2016. Disbursements began in October 2018. On December 31, 2019, EPA approved an additional US$580,000 in BEIF funds to cover increased construction costs based on actual procurement results, bringing the total BEIF participation in this project to US$3.39 million. The grant agreement was amended to include the additional funding and was signed on March 6, 2020.</strong></td>
<td><strong>Bidding for construction of the lift station began in April 2017; however, the bids received exceeded available funding. A new bidding process began in March 2018, and the contract was awarded in July 2018. Construction of the force main was completed in November 2018. Construction of the gravity line was completed in December 2019. Testing of the new lift station was completed in June 2020, thus completing the entire certified project.</strong></td>

## Project Description

### Chihuahua, Chihuahua, Mexico
#### Rehabilitation and Upgrade of the North and South Wastewater Treatment Plants

- **Type:** Wastewater
- **Total Cost:** US $14,693,467
- **Total NADB Funding:** US $11,226,131
- **Certification Date:** 11/14/19
- **Residents to Benefit:** 809,232

Rehabilitation and upgrade of the North and South Wastewater Treatment Plants (WWTPs), as well as designing, installing and operating a cogeneration facility in the South WWTP.

**Community Benefits**

Improvements to the treatment processes will help ensure that the WWTPs continue to comply with federal standards, as well as produce 33% less sludge, reducing the volume from approximately 85,932 yds³/year to approximately 57,288 yds³/year. The quality of the effluent produced by the plants will also be more consistent and reliable, which will support increased demand for treated water for reuse for irrigation and industrial purposes. By using the biogas from the sludge to generate electricity, the utility expects to supply close to 71% of the electricity required to operate the South WWTP, which will offset energy consumed from the public grid and thus help prevent the emission of 9,583 metric tons/year of carbon dioxide (CO₂), among other pollutants. Additionally, replacing the disinfection systems in both plants will eliminate the risk associated with handling chlorine gas.

#### NADB Participation

The Bank is a direct lender to complement equity contributions from Aguas de Reúso y Energía Renovable, S.A. de C.V. (ARERSA), the private concessionaire under a build-operate-transfer (BOT) agreement. On November 14, 2019, the Bank approved a peso-denominated, market-rate loan for US$11.26 million to cover approximately 76% of the project costs. The corresponding loan agreement was signed with ARERSA on December 16, 2019. Loan disbursements began in November 2020.

#### Implementation Status

The project is being constructed under a BOT agreement. Construction began in March 2020 but was suspended due to the COVID-19 pandemic. Work was reinitiated in September 2020 and is approximately 60% complete.

### Ciudad Acuña, Coahuila, Mexico
#### Storm Water Infrastructure Improvements

- **Type:** Stormwater
- **Total Cost:** US $631,492
- **Total NADB Funding:** US $500,000
- **Certification Date:** 11/14/19
- **Residents to Benefit:** 8,120

Improvements to the Santa Martha and La Misión stormwater channels.

**Community Benefits**

Improved capacity of the stormwater channels to withstand storm events with a 100-year and 200-year return periods, respectively, reducing the risk of flooding and stagnant water, thus protecting the environment and human health in the community and surrounding areas. The project will also protect a critical sewer force main, which due to erosion in both channels, is vulnerable to collapse, thereby reducing the risk of direct discharges of approximately 11.4 million gallons a day of untreated wastewater into the Rio Grande River.

#### NADB Participation

The Bank is a source of grant funds through the CAP, which complements funding from the Municipality of Acuña. On November 14, 2019, the Bank approved a CAP grant for up to US$500,000 to support project implementation. The corresponding grant agreement was signed on April 22, 2020, and disbursements began in October of the same year.

#### Implementation Status

A contract for construction of the stormwater infrastructure improvements was awarded in January 2021, and construction began in March 2021.
# Douglas, Arizona, USA
## Bay Acres Wastewater Collection System and Wastewater Treatment Plant Expansion

**Type:** Wastewater  
**Total Cost:** US $19,843,403  
**Total NADB Funding:** US $7,590,697  
**Certification Date:** 11 / 17 / 16  
**Residents to Benefit:** 17,378

**Description:**
Construction of a new wastewater collection system, including the installation of residential connections and the decommissioning of septic tanks, as well as upgrades to and expansion of the wastewater treatment plant from 2.0 million to 2.6 million gallons a day (gpd).

**Community Benefits**
Provision of first-time wastewater collection and treatment services for the entire neighborhood.
Reduction of environmental and health hazards associated with inadequate on-site wastewater treatment systems, thus providing a cleaner, healthier environment for local residents. Specifically, an estimated 96,000 gpd of sewage will be collected and treated through the new system.

**NADB Participation**
The Bank is a source of grant funds through the BEIF, to complement a loan from the Water Infrastructure Finance Authority of Arizona (WIFA) and a grant from the U.S. Department of Agriculture Rural Development (USDA-RD). On November 17, 2016, EPA approved the Bank’s recommendation to provide US$7.48 million in BEIF construction assistance for the project. The corresponding grant agreement was signed on April 19, 2017. The first BEIF disbursement occurred in June 2018. On May 18, 2020, EPA approved an additional US$115,000 in BEIF funds to cover increased costs related to the WWTP, bringing total BEIF participation in this project to US$7.59 million. The amended grant agreement was signed on June 18, 2020. The final BEIF disbursement was made on September 2, 2020.

**Implementation Status**
Bidding for wastewater treatment plant upgrades began in September 2017. The bids received exceeded available funding, so the City obtained additional funding from WIFA. Construction of the treatment plant upgrades began in April 2018 and were completed in July 2020.

Construction of the Bay Acres wastewater collection system began in March 2020, and substantial completion was achieved in March 2021. Final completion is expected in June 2021.

---

# El Paso County, Texas, USA
## Vista del Este Water System Replacement Project

**Type:** Water  
**Total Cost:** US $1,564,000  
**Total NADB Funding:** US $500,000  
**Certification Date:** 11 / 17 / 16  
**Residents to Benefit:** 1,068

**Description:** Replacement of the water distribution system and service connections in the colonia Vista del Este.

**Community Benefits**
Provision of safe and reliable drinking water services for 340 households, eliminating service disruptions and reducing water losses from line breaks by approximately 5 million gallons annually.

**NADB Participation**
The Bank is a source of grant funds through the CAP, to complement funding from El Paso County, TX. On November 17, 2016, the Bank approved a CAP grant for up to US$500,000 to cover approximately 32% of the project costs. The corresponding grant agreement was signed on May 25, 2017. The first disbursement occurred in January 2020, and the final disbursement was made on April 28, 2020.

**Implementation Status**
Construction of the water system began in November 2019 and was substantially complete in September 2020. The certificate of final completion was delivered in February 2021.
Escondido, California, USA
Don Lee Energy Storage Project

**Type:** Energy efficiency  
**Total Cost:** Reserved  
**Total NADB Funding:** US $6,800,000  
**Certification Date:** 3 / 2 / 20  
**Residents to Benefit:**

Design, construction and operation of a 6.5-megawatt alternating current (MWAC) energy storage system in an existing warehouse.

**Community Benefits**
Increased energy storage will reduce the use of ramp-up/ramp-down fossil-fuel power plants to meet electricity demand, as well as facilitate the integration of intermittent renewable energy sources, such as solar and wind. With the capacity to store and deliver up to 7,782 megawatt-hours (MWh) of energy a year, the project will displace approximately 2,866 metric tons/year of CO₂.

Increased operational efficiency and reliability of power grid by minimizing power disruptions and reducing energy losses resulting from mismatches in supply and demand.

The Bank is a direct lender to esFaraday, LLC, a subsidiary of the project sponsor esVolta, LP, which has signed an energy storage agreement with San Diego Gas & Electric (SDG&E). On March 2, 2020, the Bank approved a market-rate loan for up to US$6.8 million for the construction of the project. A US$5.0 million loan agreement was signed on March 20, 2020, and disbursements began the same month.

Don Lee was part of a portfolio of nine energy storage facilities. Two of those facilities have been completed and are in operation. Another two projects are currently under construction but have run into some delays related to the COVID-19 pandemic with commercial operations expected in late 2021. Construction of the Don Lee facility was cancelled in December 2020. The sponsor is working to develop other projects that may be eligible for NADB financing.

Gustavo Diaz Ordaz, Tamaulipas, Mexico
Wastewater Collection and Treatment Project

**Type:** Wastewater  
**Total Cost:** US $8,550,000  
**Total NADB Funding:** US $4,510,000  
**Certification Date:** 5 / 30 / 19  
**Residents to Benefit:** 12,354

Expansion and rehabilitation of the wastewater collection and treatment system, including construction of a wastewater treatment plant (WWTP) and decommissioning of the existing lagoon treatment system and residential on-site wastewater disposal systems.

**Community Benefits**
System improvements and provision of first-time wastewater collection services to 2,644 homes will reduce the potential for groundwater contamination and the risk of waterborne diseases. Specifically, the project will eliminate an estimated 570,872 gallons per day of wastewater.

The Bank is a source of grant funds through the BEIF, to complement federal, state and local funding. On May 29, 2019, EPA approved the Bank's recommendation to provide up to US$4.51 million in BEIF funding for construction and construction management services. The corresponding grant agreement was signed on December 12, 2019. BEIF disbursements began in May 2020.

Work to expand the wastewater system with Mexican funds began in 2017 and is ongoing. Construction of the Bank-funded components, including the WWTP, a force main, a lift station and residential hookups began in July 2020 and is approximately 54% complete.
### Jim Hogg County, Texas

**Water Treatment Plant Replacement and Water Meter Upgrades**

**Type:** Water

**Total Cost:** US $4,260,000

**Total NADB Funding:** US $4,260,000

**Certification Date:** 11 / 12 / 20

**Residents to Benefit:** 4,558

**PROJECT DESCRIPTION**

Construction of a reverse osmosis water plant with the capacity to treat up to 1 mgd and replacement of 1,813 water meters.

**Community Benefits**

Increased water treatment capacity, from 0.73 to 1.73 mgd, thus providing the necessary flows to meet peak demand and comply with state requirements regarding minimum capacity and redundancy, as well as ensuring adequate water quality and reducing human health risks associated with waterborne diseases, especially those related to excess arsenic and total dissolved solids. Better operational efficiency by providing a more energy efficient treatment process and better water supply control through improved metering. Improved metering will also ensure proper water billing while reducing unaccounted water losses.

**NADB PARTICIPATION**

The Bank is a direct lender to Jim Hogg County Water Control Improvement District No. 2 (JHWCIDZ). On November 12, 2020, the Bank approved a market-rate loan for up to US$4.26 million to be made in the form of municipal revenue bonds. On December 17, 2020, the Bank purchased an initial US$4.05 million in revenue bonds.

**IMPLEMENTATION STATUS**

The construction of the water treatment plant and the replacement of water meters will be initiated in the second quarter of 2021.

---

### Loma Blanca, Chihuahua, Mexico

**Wastewater Collection Project**

**Type:** Wastewater

**Total Cost:** US $1,740,000

**Total NADB Funding:** US $630,000

**Certification Date:** 11 / 9 / 17

**Residents to Benefit:** 4,993

**PROJECT DESCRIPTION**

Construction of two collectors and installation of a sewer system, including residential connections and the decommissioning of existing on-site wastewater disposal systems.

**Community Benefits**

Provision of first-time wastewater collection and treatment services to 100% of the community, which is expected to collect approximately 205,440 gallons per day of wastewater and thus reduce the health risks associated with uncontrolled wastewater discharges and inadequate on-site wastewater disposal systems.

**NADB PARTICIPATION**

The Bank is a source of grant funds through the BEIF, to complement state and federal funding. On November 7, 2017, EPA approved the Bank's recommendation to provide up to US$630,000 in BEIF funding for construction and construction management services. On November 12, 2018, the Bank signed a grant agreement with the project sponsor for US$512,000 for construction of the project. On June 3, 2019, the Bank signed a construction management agreement for US$69,000. The initial BEIF disbursement occurred in August 2019. On January 31, 2020, the construction management agreement was amended to include an additional US$48,992, for a total of US$630,000 in BEIF funds contracted.

**IMPLEMENTATION STATUS**

Construction on the sewer system began with Mexican funds in 2013. Both collectors and 92% of the wastewater collection system were completed with Mexican funds. Construction of the remaining sewer system infrastructure and 635 residential sewer connections funded by the Bank, began in September 2019 and was completed in June 2020, thus completing the entire certified project.
### Madera, Chihuahua, Mexico

**Equipment for Sanitary Landfill Operations**

- **Type:** Solid waste
- **Total Cost:** US $218,440
- **Total NADB Funding:** US $218,440
- **Certification Date:** 6 / 16 / 16
- **Residents to Benefit:** 17,050

**DESCRIPTION**

Acquisition of new equipment for landfill operations, including a mini-loader skid steer, water truck, 3.5 or 4-ton truck with hydraulic dump, vehicle scale, portable generator, portable welder and pressure washer.

**Community Benefits**

Improved landfill operations for the proper disposal of up to 17 metric tons of solid waste per day in compliance with applicable laws and regulations, reducing risks for soil and groundwater contamination, as well as the transmission of vector-related diseases.

**NADB PARTICIPATION**

The Bank is a source of grant funds through the CAP, which complements the landfill construction project funded jointly by the Municipality and the Mexican federal government. On June 16, 2016, the Bank approved a CAP grant for up to US$300,000 to cover the equipment costs, including possible fluctuations in the exchange rate. The corresponding grant agreement was signed on December 12, 2016. The first disbursement occurred in April 2018. The final disbursement occurred on December 7, 2018, leaving an unused balance of US$81,560. On March 31, 2021, the unused funds were deobligated, reducing the CAP grant for this project to US$218,440.

**IMPLEMENTATION STATUS**

Bidding to procure the landfill equipment began in August 2017. A contract for the purchase of a water tank truck was awarded in October 2017, and the truck was delivered in April 2018. Contracts for the purchase of a flatbed truck and a mini-loader skid steer were awarded in July 2018, and the equipment was delivered in October 2018. Training in the proper operation and maintenance of the equipment could not be completed because of the COVID-19 pandemic and related restrictions. The two-year maintenance service package included with the equipment purchase was completed in 2020.

### Magdalena de Kino, Sonora, Mexico

**Drinking Water System Improvements**

- **Type:** Water
- **Total Cost:** US $3,203,844
- **Total NADB Funding:** US $500,000
- **Certification Date:** 11 / 4 / 19
- **Residents to Benefit:** 12,187

**DESCRIPTION**

Creation of three hydrometric sectors in the areas known as San Isidro, Fátima and El Polvorín, including construction of three transmission lines, replacement of distribution lines and connections and installation of meters.

**Community Benefits**

Elimination of leaks in the distribution system and more reliable water service by regulating pressure and introducing redundancy in the system. These improvements are expected to reduce water losses, saving approximately 264 million gallons per year, as well as help prevent the risk of cross-contamination from leaks and stagnant water in the lines, thereby improving health conditions for residents in the San Isidro, Fátima and El Polvorín sectors of the city.

**NADB PARTICIPATION**

The Bank is a source of grant funds through the CAP, which complements federal and state grants. On November 14, 2019, the Bank approved a CAP grant for up to US$500,000 to support project implementation. The corresponding grant agreement was signed on April 15, 2020.

**IMPLEMENTATION STATUS**

Construction was divided into two phases. Construction of phase 1 components financed with Mexican funds, including the replacement of distribution lines and connections in all three sectors, as well as installation of a portion of the residential meters, began in September 2019 and was completed in May 2020. Under the second phase, construction of the transmission lines to the three elevated storage tanks was completed in October 2020. Bidding for system improvements supported by NADB funds, which includes the purchase of equipment and the installation of master meters, residential meters and telemetry systems, is expected to begin in the second quarter of 2021.
### Marathon, Texas, USA

**Wastewater Infrastructure Project**

**Description:** Replacement of a portion of the collector main that conveys wastewater to the treatment plant, as well as decommissioning of a lift station and installation of nine sewer connections.

**Community Benefits:** Prevention of line breaks, wastewater spills and sewage backups, reducing the risk of water pollution and waterborne diseases. Provision of first-time wastewater collection and treatment services to nine homes, which will collect an estimated 2,000 gpd of wastewater.

**NADB Participation:** The Bank is a source of grant funds through the BEIF. On November 7, 2018, EPA approved the Bank’s recommendation to provide US$1.55 million in BEIF construction assistance for the project. The corresponding grant agreement was signed on May 21, 2018. The initial disbursement occurred in January 2019. On October 3, 2019, EPA approved an additional US$650,000 in BEIF funds to cover increased costs based on actual procurement results, bringing total BEIF participation in this project to US$2.20 million. The amended grant agreement was signed on November 18, 2019.

**Implementation Status:** Bidding for construction of the collector main began in June 2018; however, the bids received exceeded available funding. Working with the lowest evaluated responsive bidder, the sponsor has made slight modifications to the scope of work to reduce costs and also obtained additional BEIF funds from EPA. Construction began in November 2018 and was completed in June 2020.

### Mexicali, Baja California, Mexico

**Description:** Replacement of approximately 7.3 miles of pipeline in the wastewater collection system and rehabilitation of Lift Stations No. 2, 4 and 5.

**Community Benefits:** Reduced risk of pipeline failures that can cause sewage overflows onto local streets and into the New River, which flows northward into the United States. Specifically, the project will help protect public health and the environment by preventing approximately 33.1 mgd of wastewater discharges.

**NADB Participation:** The Bank is a source of grant funds through the BEIF to complement Mexican federal, state and municipal funding. On May 19, 2020, EPA approved the Bank’s recommendation to provide US$3.39 million in BEIF construction assistance for the project. The corresponding grant agreement was signed on October 8, 2020.

**Implementation Status:** Construction began in December 2019 with Mexican funds. At the end of 2020, the rehabilitation of Lift Station No. 2 and of 0.4 miles of wastewater lines in three subdivisions had been completed. The pumping equipment for Lift Station No. 4 had also been purchased. Construction of 2.2 miles of wastewater lines in the San Marcos, Centro Civico and Santa Clara subdivisions financed with Mexican funds began in February 2021. Bidding for construction of improvements to Lift Station No. 4 to be funded by the Bank will begin in April 2021.
Mexicali, Baja California, Mexico

Rehabilitation of Small Lift Stations

Type: Wastewater
Total Cost: US $4,112,272
Total NADB Funding: US $2,055,770
Certification Date: 8 / 21 / 20
Residents to Benefit: 146,000

Community Benefits

Provision of adequate infrastructure to safely convey wastewater flows to the existing treatment plants. Reduced risk of pump failures, preventing sewage overflows onto local streets and into the New River, which flows northward into the United States. Specifically, the project will help protect public health and the environment by preventing approximately 8.7 mgd of wastewater discharges.

The Bank is a source of grant funds through the BEIF to complement Mexican federal, state and municipal funding. On August 20, 2020, EPA approved the Bank’s recommendation to provide US$2.06 million in BEIF construction assistance to support rehabilitation of five of the lift stations. The corresponding grant agreement was signed on December 18, 2020.

Construction for the rehabilitation of two lift stations, Calle G and Centro Cívico, financed with Mexican funds, began in February 2021. Bidding for the rehabilitation of three additional lift stations, Aurora, Campestre and Hidalgo, to be funded by NADB, is expected to begin in April 2021.

Mexican Border Region

Border-wide Public Transportation Improvement Program in Mexico (Pilot)

Type: Public transportation
Total Cost: US $13,546,264
Total NADB Funding: US $14,847,975
Certification Date: 6 / 24 / 14
Residents to Benefit:

Financing program to support the purchase or lease of low-emission buses manufactured by DINA Camiones, S.A. de C.V. (Dina) within the 300-km border region in Mexico, in which the Bank operates.

Community Benefits

Use of new diesel buses that at a minimum comply with EPA 2004 standards will lower nitrogen oxides (NOx) and hydrocarbons (HC) emissions by approx. 50% and will achieve nearly 24% lower carbon dioxide (CO2) emissions. The reduction in criteria pollutant emissions is even higher for compressed natural gas-fueled vehicles that comply with EPA 2013 emission standards.

The Bank is participating as a direct lender to Mercader Financial, S.A., SOFOM, E.R., a captive finance company and affiliate of Dina. On June 24, 2014, the Bank approved a market-rate loan in the form of a revolving line of credit for up to $120 million pesos to cover approximately 80% of the financing costs. The corresponding loan agreement was signed on September 30, 2014, and the first disbursement occurred in October 2015. The initial $120.0 million pesos were fully disbursed as of April 2016, for the equivalent of US$7.04 million. However, due to the revolving nature of the line of credit, Mercader can make monthly payments and have those funds available for draw down again when certain conditions are met during the disbursement period, which ends in October 2025. To date, a total of US$10.91 million has been disbursed through the credit line.

During the last quarter of 2015, a total of 33 buses were financed through the program by two public transportation companies. A company in Hermosillo, Sonora obtained 30 diesel buses to replace part of its existing fleet, while another company in Tijuana, Baja California, purchased three diesel buses to expand its fleet. In April 2016, a company in Ciudad Juarez, Chihuahua obtained 25 buses fueled by compressed natural gas (CNG) to replace part of its existing fleet. In November 2017, two companies in Guadalupe, Nuevo Leon obtained 10 CNG buses and 8 diesel buses. In August 2018, a total of 21 diesel buses were financed by a public transportation company in Guadalupe, N.L. In March 2019, a total of 10 diesel buses were financed by two public transportation companies in two municipalities in the metropolitan area of Monterrey, N.L. To date, a total of 107 buses have been financed through the program.
Certification Date: 6 / 26 / 20
Total NADB Funding: US $28,624,235
Total Cost: US $24,330,367
Residents to Benefit: 76,700

**Program to lease or finance up to 223 vehicles with cleaner technologies for public and private personnel transportation services within the Mexican border region.**

**Community Benefits**

Improved public transportation systems by providing access to new vehicles that offer a comfortable, safe and rapid transportation option. Improved air quality as the new vehicles produce less greenhouse gases than older models. Specifically, the use of 223 new vehicles is expected to lower NOx emissions by approximately 48 metric tons/year; carbon dioxide (CO₂) emissions by 1,756 metric tons/year; and particulate matter with a diameter of 2.5 micrometers or less (PM₂.₅) by 0.6 metric tons/year.

**IMPLEMENTATION STATUS**

The program will offer vehicles in two phases. The first phase was implemented in July 2020, with Value leasing 63 natural gas vehicles to the State Government of Nuevo Leon to be used for public transportation in the metropolitan area of Monterrey.

**Description**

Construction of a 250-MW wind farm with 100 wind turbines, as well as two substations and transmission line, on privately-owned rural land located about 37 miles northwest of the urban area of Monterrey.

**Community Benefits**

Reduced demand for traditional fossil-fuel based energy generation resulting in less greenhouse gas emissions, thus improving air quality, while providing a safe and reliable energy alternative. Specifically, the project is expected to help prevent the emission of an estimated 428,787 metric tons/year of carbon dioxide (CO₂) and 1,175 metric tons/year of nitrogen oxides (NOₓ), as well as other pollutants.

The Bank is a direct lender to the project company, Parque Eólico El Mezquite, S.A.P.I. de C.V., which has signed power purchase agreements with a subsidiary of the Mexican federal electricity utility, Comision Federal de Electricidad (CFE). On June 27, 2017, the Bank approved a market-rate loan for up to US$105.00 million for construction of the project. A loan agreement for US$74.10 million was contracted on September 1, 2017, and the initial disbursement occurred on October of the same year. With project construction almost complete, NADB cancelled the unsigned portion of its loan commitment for this project, which totaled US$30.90 million, reducing its participation in the project to US$74.10 million. The final disbursement for project construction occurred on May 23, 2019, leaving an unused balance of US$103,320. The amount disbursed totaled US$74.00 million.

Construction of the wind farm began in October 2017 and was completed in June 2019. Commercial operations began on June 28, 2019.

**Description**

Replacement of a section of a wastewater force main below Potrero Creek and pump station improvements.

**Community Benefits**

Elimination of the risk of line breaks, preventing approximately 84,000 gallons per day of untreated wastewater discharges to Potrero Creek. Better management of pumping equipment and energy efficiency, reducing operation and maintenance costs.

The Bank is a source of grant funds through the CAP, to complement funding from the City. On November 8, 2018, the Bank approved a CAP grant for up to US$450,000 for project construction. The corresponding grant agreement was signed on July 10, 2019. The initial disbursement occurred in December 2020.

Construction of the force main began in May 2020 and was completed in November 2020.

</table>

**Description**

Expansion of the water distribution and wastewater collection systems to unserved areas of the Flores Magón, Las Torres, Luis D. Colosio, El Rastro, Las Primaveras, and Jardines de la Montaña subdivisions, including installation of residential connections.

**Community Benefits**

Provision of first-time wastewater collection and treatment services, reducing the potential for groundwater and surface water contamination by eliminating the use of cesspools and direct discharges of untreated sewage into yards and streets, thus providing a cleaner, healthier environment for local residents. Specifically, an estimated 0.93 million gallons a day of wastewater will be collected and treated. Provision of drinking water service for households currently not connected to the distribution system.

**NADB Participation**

The Bank is a source of grant funds through the BEIF to complement federal, state and municipal funding. On November 9, 2016, EPA approved the Bank's recommendation to provide US$5.26 million in BEIF funds for the construction of the project, and the corresponding grant agreement was signed on July 10, 2017. The initial disbursement was made in February 2018.

**Implementation Status**

Phase 1 wastewater lines were completed with Mexican funding in December 2016. Construction of the Collector Tecnológico funded by the Bank was completed in August 2018. Phase 2 and 3 wastewater lines were completed in April 2020. Installation of remaining Phase 2 & 3 residential connections began in June 2020 and was completed in February 2021; however, the contract was extended to connect four laterals to the new Collector Tecnológico, with the work expected to take about five months to complete. Construction of Phase 4 wastewater lines and residential connections began in July 2020 and is 55% complete.

**Description**

Expansion and rehabilitation of the wastewater collection and treatment system, including construction of a wastewater treatment plant (WWTP) with capacity of 270,000 gallons a day.

**Community Benefits**

First-time access to wastewater services for 244 homes in unserved areas of the city, as well as improved service for the rest of the community. Wastewater treatment coverage for 100% of the community and higher quality effluent, which will reduce water pollution and the risk of waterborne diseases. The new plant will also have a methane capture and conversion system to reduce the effects of greenhouse gas emissions.

**NADB Participation**

The Bank is a source of grant funds through the BEIF to complement federal, state and municipal funding. On January 27, 2020, EPA approved the Bank's recommendation to provide US$2.06 million in BEIF funds for the construction of the project, and the corresponding grant agreement was signed on September 15, 2020.

**Implementation Status**

The gravity sewer main connecting the sewer system to the site of the WWTP was installed in 2017 with Mexican funds. Bidding for construction of the BEIF-funded components, including construction of the WWTP, the West sewer main and Phase 2 wastewater collection lines in the western area of the city, is scheduled to begin in the third quarter of 2021.

### DESCRIPTION

Construction of a 317.5-MW solar park, using photovoltaic modules mounted on a single-axis tracker system in a rural area of the Sonora Desert.

**Community Benefits**

Reduced demand for traditional fossil-fuel based energy generation resulting in less greenhouse gas emissions, thus improving air quality, while providing a safe and reliable energy alternative. Specifically, the project is expected to help prevent the emission of an estimated 440,390 metric tons/year of carbon dioxide equivalent (CO₂e).

### NADB PARTICIPATION

The Bank is a direct lender to the two project companies, AT Solar V, S. de R.L. de C.V., and Tuto Energy II, S.A.P.I. de C.V., which have signed power purchase agreements with two subsidiaries of the Mexican federal electricity utility, **Comision Federal de Electricidad (CFE)**, as well as with a private off-taker. On March 8, 2018, the Bank approved a market-rate loan for up to US$75.00 million for construction of the project. A loan agreement for US$65.99 million was contracted on July 12, 2018, and disbursements began in August of the same year. With project construction almost complete, NADB cancelled the unsigned portion of its loan commitment for this project, which totaled US$9.01 million, reducing its participation in the project to US$65.99 million. The final loan disbursement was made on December 2, 2019.

### IMPLEMENTATION STATUS

Construction of the solar park began in January 2018 and was substantially complete in June 2019. Commercial operations began on June 5, 2019.
### Playas de Rosarito, Baja California, Mexico

#### Description

Paving of approx. 34,518 m² of dirt roads, repaving of approx. 39,676 m² of roads and other roadway improvements, replacement of aging water and wastewater infrastructure, replacement of street lighting equipment and acquisition of maintenance equipment.

**Community Benefits**

Paving works will help improve air quality by reducing vehicular dust caused by traffic on unpaved roads and relieving traffic congestion at peak hours. Specifically, increased paving coverage is expected to prevent the emission of 32.8 metric tons/year of PM₁₀, while better urban mobility will help reduce vehicle emissions, including an estimated 77.43 kg/year of volatile organic compounds, 491 kg/year of carbon monoxide, and 157.54 kg/years of nitrogen oxides. The project will also provide safer roadways for motorists and pedestrians, as well as allow faster access for emergency services. The replacement of streetlamps will help reduce energy consumption by approximately 9.6% a year, which will help prevent the emission of an estimated 33 metric tons/year of carbon dioxide (CO₂). Additionally, the project will contribute to the provision of adequate water and wastewater services.

#### NADB Participation

The Bank is a direct lender to complement federal funding in support of the new infrastructure and equipment (est. cost of US$5.11 million), as well as to refinance an existing loan (est. cost of US$12.0 million) to obtain a longer term and better financing conditions, allowing the Municipality to apply part of the savings toward investments in additional infrastructure needs. On May 14, 2015, the Bank approved a peso-denominated, market-rate loan for an estimated US$16.25 million to refinance the existing loan and finance up to 80% of the cost of the new infrastructure works and equipment. On June 9, 2015, a loan agreement for up to US$16.10 million was contracted with the Municipality. On September 1, 2015, the loan was fully disbursed for a total of US$13.65 million: US$9.98 to refinance the existing loan and US$3.67 million to cover part of the cost of the new infrastructure works and equipment.

#### Implementation Status

The Municipality has already paved approximately 23,300 m² of roadways. A contract funded by NADB for asphalt street paving (approx. 32,600 m²), including replacement of sewer lines, was completed in June 2016. A second contract funded by NADB for urban revitalization, including concrete street paving (approx. 2,163 m²), sidewalks, public lighting, green areas and replacement of water and sewer lines, was completed in August 2016. A third paving contract (7,912 m²) funded by NADB was completed in September 2017.

Bidding for five street paving contracts (approx. 8,994 m²) to be funded by NADB is expected to begin in April 2021.
### Project

**Presidio, Texas, USA**

**Water System Improvements Project**

**Type:** Water

**Total Cost:** US $4,500,000

**Total NADB Funding:** US $4,500,000

**Certification Date:** 11/14/19

**Residents to Benefit:** 4,000

**Description**

Extension of the water distribution system along Highway 67, including construction of a booster station and 50,000-gallon elevated water tank, as well as construction of a water tank transmission line.

**Community Benefits**

Improved system sustainability by reducing pressure in the distribution lines, thus eliminating line breaks that can lead to contamination of the water supply and preventing at least 80,000 gallons a day in water losses from the system. Provision of first-time access to drinking water services for 10 households.

**NADB Participation**

The Bank is a source of grant funds through the BEIF, as well as a direct lender. On October 4, 2019, EPA approved the Bank’s recommendation to provide US$3 million in BEIF funding for the construction of the project. On November 14, 2019, the Bank approved a market-rate loan for up to US$800,000 to complete the financial structure of the project. The BEIF grant agreement was signed on March 11, 2020. On August 4, 2020, the Bank approved a US$700,000 loan increase to cover increased costs based on actual procurement results, bringing the total loan for this project to US$1.50 million. The loan was executed in the form of a combination tax and revenue certificate of obligation and fully disbursed, on November 19, 2020. BEIF grant disbursements began in October 2020.

**Implementation Status**

Construction began in September 2020. The new distribution and transmission lines have been completed. Construction of the booster station and water storage tank is expected to be completed in May 2021.

### Project

**Región Cinco Manantiales, Coahuila, Mexico**

**Equipment for Sanitary Landfill Operations and Waste Collection**

**Type:** Solid waste

**Total Cost:** US $465,209

**Total NADB Funding:** US $412,501

**Certification Date:** 6/16/16

**Residents to Benefit:** 77,800

**Description**

Acquisition of a backhoe and water tank truck for landfill operations, as well as five garbage collection trucks for the municipalities of Allende, Morelos, Nava, Villa Unión and Zaragoza.

**Community Benefits**

Improved landfill operations for the proper disposal of up to 75 metric tons of solid waste per day in compliance with applicable laws and regulations, reducing risks for soil and groundwater contamination, as well as the transmission of vector-related diseases. Improved collection services for an estimated 21,600 households.

**NADB Participation**

The Bank is a source of grant funds through the Community Assistance Program (CAP), to complement funding provided by the Asociación Pro-limpieza de los Cinco Manantiales de Coahuila, A.C., the non-profit organization that operates the regional sanitary landfill. On June 16, 2016, the Bank approved a CAP grant for up to US$500,000 to cover up to 90% of the equipment costs. The corresponding grant agreement was signed on February 2, 2017, and disbursements began in December of the same year. The final disbursement occurred on July 30, 2020, leaving an unused balance of US$87,499. On March 31, 2021, the unused funds were deobligated, reducing the CAP grant for this project to US$412,501.

**Implementation Status**

Bidding to procure landfill and waste collection equipment began in August 2017. A contract for the purchase of two garbage collection trucks for the communities of Morelos and Villa Unión was awarded in September 2017, and the two trucks were delivered in February 2018. A contract for the purchase of three garbage collection trucks was awarded in June 2018. Two trucks were delivered to the project sponsor in July, and the last truck was delivered in August 2018. In March 2019, operators from all five municipalities received training in the proper operation and maintenance of the equipment. The two-year maintenance service package included with the equipment purchase was completed in 2020.
### Reynosa, Tamaulipas, Mexico

#### Wastewater Collection and Treatment Project

**Type:** Wastewater  
**Total Cost:** US $15,908,735  
**Total NADB Funding:** US $7,330,512  
**Certification Date:** 5 / 6 / 16  
**Residents to Benefit:** 266,853

#### DESCRIPTION

Expansion of the Wastewater Treatment Plant No. 2 (WWTP 2), to increase capacity from 5.7 mgd to 17.1 mgd, as well as construction of Lift Station No. 278, rehabilitation of Lift Station No. 1 and decommissioning of three lift stations.

**Community Benefits**

Expansion of wastewater treatment coverage, preventing untreated sewage discharges from entering the Rio Grande River, which will reduce environmental pollution and the risk of waterborne diseases, thus providing a safer and healthier source of water for the city, as well as for downstream users. Specifically, an estimated 9.0 mgd of wastewater will be collected and treated.

#### NADB PARTICIPATION

The Bank is a source of grant funds through the BEIF, to complement federal funding provided through the Mexican federal water agency, CONAGUA. On March 23, 2016, EPA approved the Bank's recommendation to provide US$7.08 million in BEIF funding for the construction of this project. The corresponding grant agreement was signed on June 16, 2016. The initial disbursement occurred in May 2017. On September 2, 2020, EPA approved an additional US$250,000 in BEIF funds to cover increased construction costs, bringing total BEIF participation in this project to US$7.33 million. The grant agreement was amended to include the additional funding and was signed on November 10, 2020.

#### IMPLEMENTATION STATUS

Construction of Lift Stations 1 and 278 funded by the Bank began in May 2017. Work on Lift Station 1 was completed in May 2020. Construction of Lift Station 278 was temporarily suspended in order to replace the contractor. Work was reinitiated in February 2019 and completed in February 2021.

Construction to expand WWTP 2 began in 2014 with Mexican funds and is expected to be completed by June 2021.

### Reynosa, Tamaulipas, Mexico

#### Delaro Wind Energy Project

**Type:** Renewable energy  
**Total Cost:** Reserved  
**Total NADB Funding:** US $50,000,000  
**Certification Date:** 11 / 14 / 19  
**Residents to Benefit:** 226,219

#### DESCRIPTION

Construction of a 117-MW wind farm with 27 wind turbines, as well as a substation and transmission line, on privately-owned rural land located about 25 miles southwest of the city.

**Community Benefits**

Reduced demand for traditional fossil-fuel based energy generation resulting in less greenhouse gas emissions, thus improving air quality, while providing a safe and reliable energy alternative. Specifically, the project is expected to help prevent the emission of an estimated 195,326 metric tons/year of carbon dioxide (CO₂) and 615 metric tons of sulfur dioxide (SO₂), as well as other pollutants.

#### NADB PARTICIPATION

The Bank is a direct lender to the project company, Delaro, S.A.P.I. de C.V., which has signed power purchase agreements with several private firms. On November 14, 2019, the Bank approved a market-rate loan for up to US$50.00 million for construction of the project. A loan agreement for US$32.00 million was contracted on December 16, 2019.

#### IMPLEMENTATION STATUS

Construction of the wind farm is on hold due to the new energy regulations in Mexico.

**Description**

Construction of a seawater desalination facility with the capacity to produce 5.7 mgd of drinking water for the San Quintín Valley in the municipality of Ensenada, B.C.

**Community Benefits**

Development of an additional water supply source to ensure sustainable and reliable drinking water services for residents of San Quintín Valley, contributing to the preservation of groundwater resources and human health.

**NADB Participation**

The Bank is a direct lender to complement equity contributions from the private concessionaire, Desaladora Kenton, S.A. de C.V., through a public-private partnership (PPP) with the state water agency. On March 8, 2018, the Bank approved a market-rate loan for up to US$36.61 million to cover approximately 76% of the project costs. The corresponding loan agreement was signed on March 28, 2018, and the condition precedent for loan commitment was met on September 30, 2018.

**Implementation Status**

The project is being implemented under a build-operate-transfer (BOT) agreement. Construction is on hold due to change in state and municipal administrations.

**Description**

Installation of up to 278 yard-line connections to the new sewer system and decommissioning of all on-site septic systems.

**Community Benefits**

First-time wastewater collection and treatment services for the Rosa Azul subdivision, thus eliminating the environmental and health risks associated with the inadequate disposal of wastewater. Specifically, an estimated 100,000 gallons per day of wastewater will be collected and treated.

**NADB Participation**

The Bank is a source of grant funds through the CAP to complement funding provided by the Lower Valley Water District (LVWD). On November 12, 2020, the Bank approved a CAP grant for up to US$500,000 for project implementation. The corresponding grant agreement was signed on February 25, 2021.

**Construction**

Construction for installation of Phase 1 and 2 residential wastewater connections began in September 2020.

**Description**

Construction of a drinking water system, including the installation of a water transmission line, storage tank and distribution system, as well as equipping an existing well with a new power connection, pumping equipment and disinfection system.

**Community Benefits**

Provision of first-time access to safe and reliable drinking water service for 33 homes, eliminating the health risks associated with hauling water for residential use.

**NADB Participation**

The Bank is a source of grant funds through the CAP to complement funding provided by the local water utility and state water agency. On June 19, 2018, the Bank approved a CAP grant for up to US$250,000 to cover up to 90% of the project costs, including possible fluctuations in the exchange rate and construction contingencies. The corresponding grant agreement was signed on March 7, 2019. Disbursements began in September 2020.

**Construction**

Construction of the water system began in September 2020 and is 70% complete.

| **Sunland Park and Santa Teresa, New Mexico, USA**  
Camino Real Regional Authority Wastewater Treatment Project | Replacement of the 0.5-mgd North Wastewater Treatment Plant (WWTP) with a new 1.0-mgd package WWTP using extended aeration technology, and rehabilitation of the View Pointe Lift Station.  
**Community Benefits**  
Increased wastewater treatment capacity and improved effluent quality in compliance with current permit requirements, eliminating the risk of untreated or inadequately treated sewage discharges. Specifically, the new plant will treat 0.70 mgd of wastewater generated by the 1,981 residential connections currently served by the North WWTP and has the capacity to be expanded to meet future demand. | The Bank is a source of grant funds through the BEIF, to complement a grant from the State of New Mexico. On December 23, 2014, EPA approved the Bank's recommendation to provide US$8.0 million in BEIF funds for the construction of the project. The corresponding grant agreement was signed on May 18, 2015. On May 8, 2017, EPA agreed to provide an additional US$1.00 million in BEIF construction assistance to help cover increased costs based on actual procurement results, bringing total BEIF participation in this project to US$9.00 million. The initial disbursement occurred in December 2017. The grant agreement was amended to include the additional funding and was signed on January 15, 2018. | Construction of the new WWTP began in July 2017 and was completed in March 2019, along with the rehabilitation of the View Pointe Lift Station. The plant is in operation. |

| Type: | Wastewater | Total Cost: | US $12,700,000 |
| Total NADB Funding: | US $9,000,000 |
| Certification Date: | 4 / 23 / 15 |
| Residents to Benefit: | 6,438 |
Expansion of the water distribution and wastewater collection systems in Tijuana, expansion of the wastewater collection system in Playas de Rosarito, upgrades to the Rosarito I Wastewater Treatment Plant (WWTP) and completion of the La Morita WWTP and the Tecolote-La Gloria WWTP.

**Community Benefits**

Reduction of environmental and health hazards associated with inadequate sewage disposal, thus providing a cleaner, healthier environment for local residents. An estimated 3 mgd of wastewater will be collected and treated prior to being discharged into the Pacific Ocean. Provision of first-time water services to currently unserved areas.

**NADB Participation**

The Bank is a direct lender to complement funding from the local water utility, CESPT. In addition, several components of this project are expected to receive BEIF grants, along with matching Mexican grants. On July 21, 2009, the Bank approved a market-rate loan for up to US$27.96 million for the project. On July 17, 2009, EPA approved the Bank’s recommendation to provide a total of US$2.20 million in BEIF funds as follows: US$1.36 million for the Rosarito I WWTP and US$845,682 for the Aztlan, Independencia and Lomas de Rosarito sewer systems. The three sewer systems were completed with Mexican funds, so all of the BEIF funds will be used to fund the Rosarito I WWTP. On September 18, 2009, a US$22.08 million loan agreement was signed for the first tranche of the loan and disbursements began in December of the same year. The utility determined that the remainder of the loan was unnecessary and decided not to contract the second tranche. As a result, on August 6, 2010, the unsigned portion of the loan was cancelled, reducing the Bank’s participation in this project to US$24.28 million. On February 1, 2011, two additional components were certified for funding under this loan: the La Morita WWTP and the Tecolote-La Gloria WWTP. On February 16, 2011, EPA approved the Bank’s recommendation to provide a US$1.50 million BEIF grant for expansion of the Ejido Plan Libertador sewer system in Playas de Rosarito and a US$430,567 BEIF grant for expansion of the Alcatraces sewer system in Tijuana. As a result, total Bank participation in this project comes to US$26.21 million. On October 26, 2012, three additional components were certified for funding under this loan: the La Cuesta sewer system, the Farallon Collector and the SEDUE-SAAS force main. On December 3, 2014, additional sewer rehabilitation works in Tijuana were certified for partial funding under this loan, along with US$3 million in BEIF funds, bringing Bank participation to US$29.20 million. As of December 31, 2015, a total of US$1.48 million in BEIF funds has been deobligated from four projects, reducing Bank participation to US$29.46 million.

**Implementation Status**

Five water storage tanks totaling 11,000 m³, two pump stations, and waterlines in four subdivisions have been completed, as well as two wastewater force mains. Construction of the 9-km Matanuco collector was completed in July 2010. The La Morita plant has also been completed and began operations in August 2010. The La Cuesta sewer system in Tijuana was completed in January 2013. Rehabilitation of the SEDUE-SAAS force main was completed in April 2013. Expansion of the Rosarito I WWTP was completed in September 2013. Rehabilitation of the Farallon collector was completed in February 2014. The sewer lines in Ejido Plan Libertador in Playas de Rosarito and in Col. Alcatraces in Tijuana, were completed in December 2013. Additional sewer connections related to these two projects were completed in September 2014. Rehabilitation of four wastewater collectors was completed in December 2015. Construction on the fourth phase of the Sanchez Taboada collector was completed in February 2016. Rehabilitation of two sections of the same collector funded by the Bank began in July 2015 and was completed in February 2016. Two contracts for residential hookups in Tijuana were completed in September 2016. The rehabilitation of three collectors began in September 2016, and the work was completed in May 2017. Rehabilitation of the wastewater collection system that discharges to the Las Américas Collector began in August 2017 and was completed in October 2018.

The Tecolote-La Gloria plant is approximately 55% complete; but construction is currently on hold due to a contractor dispute.

**DESCRIPTION**

Rehabilitation of segment 1A of the Collector Poniente.

**Community Benefits**

Reduced risk of line breaks and leaks, thereby preventing the potential contamination of surface and groundwater sources. Specifically, the project will prevent the potential discharge of approximately 4 mgd of untreated wastewater, which could affect the Tijuana River, a transboundary water body.

**NADB PARTICIPATION**

The Bank is a source of grant funds through the BEIF, to complement federal and state and equity investments made by the local utility, CESPT. On May 3, 2019, EPA approved the Bank's recommendation to provide US$2.42 million in BEIF funds for the construction of the project. The corresponding grant agreement was signed on June 6, 2019, and disbursements began in September of the same year.

**IMPLEMENTATION STATUS**

Segment 1A was divided into four sections. Construction on sections 1, 2 and 3 financed with Mexican funds, began in July 2019 and was completed in August 2020. Construction of section 4 funded by the Bank began in August 2019 an was completed in August 2020 under budget.

CESPT requested that the unused BEIF funds be applied towards the cost of replacing a collapsed segment of the Cañón del Sainz-Los Reyes sewer line and its connection to the Collector Poniente. Construction on the sewer line began in December 2020 and is expected to be completed in May 2021.

</table>

**DESCRIPTION**

Construction of an arsenic treatment facility (ATF) for water wells No. 2 and 3, as well as 19 new residential wastewater connections that will be incorporated into the ATF waste line.

**Community Benefits**

Improved water quality by reducing arsenic concentrations to acceptable levels in compliance with current federal regulations, as well as removing iron and manganese ions. First-time sewer service for 19 households, eliminating approximately 5,600 gallons per day of inadequately treated and untreated wastewater.

**NADB PARTICIPATION**

The Bank is a source of grant funds through the BEIF. On May 8, 2014, EPA approved the Bank's recommendation to provide US$3.25 million in BEIF construction assistance for this project. The corresponding grant agreement was signed on November 14, 2014. On May 4, 2016, EPA approved an additional US$498,612 in BEIF funds to cover increased costs based on actual procurement results, bringing total BEIF participation in this project to US$3.75 million. The amended grant agreement was signed on May 12, 2016, and disbursements began in September 2016.

**IMPLEMENTATION STATUS**

Construction of the arsenic treatment facility and related works began in June 2016. Work was substantially complete, and the ATF began operations in February 2017. The remaining work was completed in September 2017.

### Vinton, Texas, USA
#### Wastewater Collection System

</tr>
</tbody>
</table>

**DESCRIPTION**

Construction of a wastewater collection system, including a lift station and 503 residential connections for the Village of Vinton, located about 25 miles north of downtown El Paso.

**Community Benefits**

First-time access to wastewater collection and treatment services for 90% of the community, reducing the human health risks associated with waterborne diseases. Specifically, an estimated 275,000 gallons per day of wastewater will be collected and treated.

**NADB PARTICIPATION**

The Bank is a source of grant funds through the BEIF, to complement a loan and grant from the Texas Water Development Board (TWDB). On November 7, 2019, EPA approved the Bank's recommendation to provide US$3.00 million in BEIF funds for the construction of the project. The corresponding grant agreement was signed on January 8, 2021.

**IMPLEMENTATION STATUS**

Construction of phase 1 of the new wastewater collection system (south of Vinton Road) funded by TWDB began in September 2020 and is approximately 36% complete. Bidding for construction of phase 2 of the system (north of Vinton Road) to be funded by TWDB is expected to begin in the second quarter of 2021.
## Vinton, Texas, USA
**Drinking Water Distribution System**

- **Type:** Water
- **Total Cost:** US $10,618,500
- **Total NADB Funding:** US $3,500,000
- **Certification Date:** 2 / 24 / 20
- **Residents to Benefit:** 1,480

**Construction of a new water distribution system for the Village of Vinton, located about 25 miles north of downtown El Paso.**

### Community Benefits
Access to safe and reliable drinking water services for 367 households, thus reducing the human health risks associated with waterborne diseases. In particular, the project will eliminate exposure to arsenic and pathogenic organisms present in the current water supply.

### NADB Participation
The Bank is a source of grant funds through the BEIF, to complement a loan and grant from the U.S. Department of Agriculture (USDA). On January 27, 2020, EPA approved the Bank’s recommendation to provide US$3.50 million in BEIF funds for the construction of the project. The corresponding grant agreement was signed on January 8, 2021.

### Implementation Status
Construction of phase 1 of the water distribution system (south of Vinton Road) funded by USDA began in April 2020 and is approximately 90% complete. Bidding for construction of phase 2 of the system (north of Vinton Road) to be funded by NADB is expected to begin in the second quarter of 2021.

## Webb County, Texas, USA
**BayWa Corazon Solar Project**

- **Type:** Solar energy
- **Total Cost:** Reserved
- **Total NADB Funding:** US $100,000,000
- **Certification Date:** 12 / 11 / 20
- **Residents to Benefit:** 138,970

**Construction of a 200-MW solar park, using bifacial monocrystalline photovoltaic modules mounted on single-axis tracking arrays on private land located about 16 miles northeast of the city of Laredo.**

### Community Benefits
Reduced demand for traditional fossil-fuel based energy generation resulting in less greenhouse gas emissions, thus improving air quality, while providing a safe and reliable energy alternative. Specifically, the project is expected to help prevent the emission of an estimated 258,338 metric tons/year of carbon dioxide (CO₂).

### NADB Participation
The Bank is a direct lender to the project company, Corazon Energy, LLC, which will sell the energy to a private company pursuant to power purchase agreement, as well as on the wholesale electricity market. On December 11, 2020, the Bank approved a market-rate loan for up to US$100.00 million for construction of the project. A loan agreement for US$62.90 million was contracted on February 26, 2021, and disbursements began in March of the same year.

### Implementation Status
Construction of the solar park began in July 2020 and is approximately 60% complete.
